The following is an Examiner's statement of reasons for allowance:

Bach et al. (US Pat No. 5,684,034) teach a class of 1-indole-3-acetamide compounds that are useful for inhibiting sPLA₂ mediated release of fatty acids. The instant compound differs from the prior art, which is further substituted by different variables such as acylamino acid linker (R₄) that is attached directly to the indole core structure. The prior art compounds neither teach nor render obvious the instant claimed compound and there is no suggestion or motivation
